

# **CS5610 Web Development Project 1**

## **Personal Website**

## **Project Description**

The objective is to build a personal homepage that illustrates personal and professional information about myself. This is a project for the CS5610 Web Development class at Northeastern University. This project is supposed to be built using HTML, CSS, Bootstrap, and JavaScript. The project also allows us to get familiar with eslint and prettier. The website is W3C Compliant and shows the use of HTML/CSS and JavaScript together.

## **User Personas**

- Recruiters/Hiring Managers looking at candidate profile.
- Northeastern university faculty and students.
- Business owners looking to hire freelance developers.
